Our goal at Children's Dental Care is to  
make your child's dental visit as  
pleasant and safe as possible.

Our highly skilled anesthesiologists and  
pediatric dentists work together to  
offer you and your child the best  
experience.

CHILDREN'S DENTAL CARE

About the Anesthesia Team  
Pediatric Anesthesia Associates is a  
large group of highly trained pediatric  
anesthesiologists that have been  
providing general anesthesia services  
for many years to children of  
southeast Michigan at  
Children's Hospital of Michigan.

BIG SMILES, LITTLE KIDS.  
WE'RE EXPERTS AT BOTH

The American Academy of Pediatric Dentistry as the advocate for oral health in children and persons with special health care needs, recognizes that General Anesthesia is effective and safe for children with:

- extensive dental treatment,
  - high anxiety or fear,
- uncooperative age-appropriate behavior,
- disabilities, or other medical conditions.

## Before your appointment

*Provide* our office with a complete and updated health history of your child  
*Follow* instructions of our office regarding required health forms before dental surgery  
*Follow* office instructions regarding feeding to prevent pneumonia and anesthesia complications, your child should not eat or drink milk the day of the procedure.

## Safety is Our Priority

Before having anesthesia, your child will need a physical examination by a pediatrician to identify any health issues that could affect the safety of anesthesia. In addition, at the day of the treatment, one of the anesthesiologists will examine the child, and review your child's current health and medical history before anesthesia.

## What is General Anesthesia?

General anesthesia provides deep sleep. Because our goal is to provide the safest and most comfortable way to treat young children with extensive decay, our pediatric anesthesiologists work together to provide deep sleep during the procedure. Breathing and vitals will be monitored throughout the procedure. The pediatric dentist performs all necessary treatment in one visit.

## During Your Child's Visit We Perform:

Comprehensive Exam/X-Rays  
Dental Cleaning  
Restoration (Fillings and Crowns)  
Extractions  
Space Maintainers

**All necessary treatment will be done in one visit**
